**ultra green**™

## Green's New Gold Standard.

It's a fact: your customers want green products more than ever. But your competitors know this, too. So how do you stand out and capture their attention? You offer products made from renewable natural resources like wheat straw and renewable natural resources instead of trees and petroleum. You buy products that are manufactured right in the heartland of America. You use disposables that you can actually feel good about disposing of. You offer customers products that perform as well as they look. You don't just go green. You go Ultra Green.

Completely Compostable.  
Totally Biodegradable.  
100% Remarkable.

Ultra Green is truly your one-stop-shop for disposable earth-friendly products. The line features premium quality biodegradable and compostable products made from renewable natural fibers and cornstarch. Better materials. Better design. Better results for your business.

***Are you ready to go Ultra Green?***

**Cornstarch-Based Products:** *[biodegrade in 150 days\*]* Cups & Utensils

**Renewable Natural Fiber Products:** *[biodegrade in 60-90 days\*]*

Plates • Take-out Containers • Bowls • Tissues & Napkins • Bathroom Tissue • The World's First Round Pizza Box for Take 'n Bake

## Earth-Friendly Products. Business-Friendly Math.

Recent research indicates that green is here to stay. 93% of consumers feel that a company being green is important to their purchase decision and 84% of consumers currently purchase at least some green products\*. If you can “out-green” the competition, you can instantly gain a competitive advantage and foster positive associations with your business. And, because Ultra Green products are both earth-friendly and premium quality, they can help you command a higher margin at checkout.

*\*Grail Research, September, 2009*

## Why tree-free is better for the environment.

Trees take 20 years to re-grow. Renewable natural fibers take 9 months or less. In many ways, it's that simple. Best of all, the material used in Ultra Green is actually the bi-product that would many times be thrown away or burned.

### How do you make a better plastic fork?

Start by removing the *plastic*.

Ultra Green's line of earth-friendly utensils are made from PLA, a plastic derived from renewable natural resources such as corn. As a result, these utensils will actually compost in as little as 150 days in a commercial composter - unlike traditional petroleum-based plastic utensils, which can take over 150 years.

# The TreeSaver™ Line: Beyond Recycled.

## Boxes, Pans & Lids

Ultra Green's TreeSaver line features a higher standard of tree-friendly disposable products. Every bowl, plate, box and portion cup is made from 100% renewable natural fibers.\* Our clear lids are made from PET/recycled plastic bottles. That makes them not only more renewable, but also allows you (and your customers) to re-heat and even oven bake right in the TreeSaver products.

**\*ASTM-6868 Certified.**
